EDUCATION

Indian Institute of Technology Bhilai <i>Bachelor of Technology in Computer Science & Engineering</i>	2022 – 2026 CGPA: 8.48/10
---	--

WORK EXPERIENCE

Ocrolus <i>Software Engineer</i> [React, Redux, Python, gRPC] - Leading frontend development of Detect (document-fraud detection), building the React tamper-evidence overlay pipeline and transforming ML bounding boxes from PDF point space to pixel space. - Reduced false-positive fraud signals by standardizing authenticity thresholds and extending the Python-based gRPC service with indicator-level filtering.	Jun'26 – Present
Ocrolus <i>Software Engineering Intern</i> [React, Tanstack Query, Java, Prometheus, Grafana, Claude Code] - Built a Forms Management Service replacing manual Retool + SQL onboarding, reducing client onboarding effort by 5+ hours per workflow. - Developed Nights Watch, a React dashboard for debugging Flowable workflows through DLQ inspection and recursive process-tree traversal. - Swapped a planned DLQ-history table for a Prometheus counter tagged activity × org × exception, sizing cardinality at 250K series.	Aug'25 – Jun'26
Publicis Sapient <i>Associate Software Development Intern</i> [SFCC, Gemini, Git Hooks] - Implemented natural-language order search using Gemini LLM, generating queries for simplified product lookups. - Developed a preview tool in PWA headless architecture for real-time storefront testing. - Integrated ESLint with Husky hooks to enforce backend code quality and prevent potential code issues.	May'25 – Jun'25

PROJECTS

Avanti Fellows Quizzing Engine [VueJS, Python, MongoDB] - Improved question shuffling feature end-to-end (planning, development, testing, docs) to reduce copying. - Added copy-paste restrictions and optimized splash screen data for smoother usability. - Contributed 5 merged PRs to this open-source test prep platform serving over 90,000+ Students.	Substack GitHub
Stock-Grok [React Native, Zustand, AsyncStorage, Alpha Vantage API] - Built a real-time stock tracker with modular design, tab/stack navigation, theming, and charts. - Added time-based caching (daily, weekly, monthly) to cut latency and meet API rate limits. - Used Zustand + AsyncStorage state system with domain-specific stores for persisted and type-safe state.	GitHub

SKILLS

- Programming Languages: Go, JavaScript, C++, C - Frameworks & Libraries: ReactJS, React Native, Zustand, NodeJS, ExpressJS, Jest, Cypress - Databases: PostgreSQL, MySQL - Tools & Platforms: Prometheus, Grafana, Docker, Git, VS Code, Kubernetes (k8s) - AI/ML Techniques: Retrieval-Augmented Generation (RAG), Fine-tuning	
--	--

AWARDS AND ACHIEVEMENTS

- Delivered 8+ contributions to open-source platforms such as Signoz, Avanti Fellows and AMRIT by PSMRI. - Pupil @Codeforces, achieved Global Rank 298 in Codechef Starters 117 & solved 400+ questions. - Received GeetAmal Ghosh-Roy Award for academic excellence among 200+ students at IIT Bhilai.	
---	--

POSITION OF RESPONSIBILITIES

- Lead @FoSS Club IIT Bhilai, Open Source Community under FOSS United India - Campus Leader @C4GT, Open Source Community for Digital Public Goods - Coordinator @FoSS Overflow'24, Annual Open Source Development Program, IIT Bhilai	<i>Sep 2024 – Present</i> <i>Sep 2024 – May 2024</i> <i>Dec 2024 – Feb 2024</i>
